

# Economizing not only helps the environment

## but also saves your money

The expenses for electricity and water of the entire dormitory are allocated among all the tenants by a fixed rate, which is adjusted anew every year. As soon as there is reduction, this can be given on to the students. This means a motivation for you personally to conserve energy and to go easy with resources whenever possible.

**Tell your fellow tenants – because you are paying for their wrongdoing!!!**

### Save heating costs

### Airing correctly

Average duration of the change of air depending on the opening of door and window

➤ **2 – 3 times a day**

## Save water

- Shower for max 5 min

## Save electricity

- Switch all electronic devices off! (No standby!!)

- Turn off the lights when not needed!

Bottom line: With the conscious handling of energy and water you can save a lot of money and do the environment a huge favor!
